Vizura® + Bio Dunder®

Minimise nitrogen loss and enhance fertiliser efficiency with the addition of Vizura to your Bio Dunder product.

What does it do?

Vizura works to prevent nitrogen losses from nitrate leaching and nitrous oxide emissions.

Adding Vizura to your Bio Dunder product helps keep the nitrogen in the more stable ammonium form.

What is it?

Vizura is a nitrification inhibitor that delays the transformation of ammonium (NH₄⁺) to nitrite (and nitrate) for a certain period of time. It has been specially formulated to work with organic material such as Bio Dunder.

Where should I use it?

Vizura + Bio Dunder can help improve nitrogen efficiency in farm areas that may have:

- light sandy soil;
- poor drainage; or
- are prone to waterlogging.

For more information contact **Damian Baxter** on **0417 161 805** or the office on **07 49409822**
